

IF THE WINEMAKER
Wants a very delicate, grapey wine, he will take every precaution to keep oxygen away from it at every stage. In ancient Rome, air was kept from wine in a bottle by a layer of oil on the top.

THOMAS JEFFERSON wine connoisseur and would-be wine grower, promoted wine as the best means of combating Intemperance.

WHEN STORING
Wine, the ideal temperature is 58F. At this degree, white wines will stay cool enough for serving, while reds will mature slowly but steadily.

RED WINES
 Extract all their color from a period of contact between the juice and skins after crushing. In general, white wines are removed quickly from their skins to avoid any coloration.

WHY CORK

for a wine plug? It's light, clean and almost impermeable. It's smooth, yet stays firmly in position in the neck. It doesn't expand or contract with changes in temperature, rarely rots and doesn't burn easily.

CORK IS

the outer bark of the cork oak tree, which grows most abundantly in Spain and Portugal. Before it is harvested, a cork tree must grow for 20 years; then the bark can be stripped about once every decade.

ONCE IN POSITION

a good cork will last at least 25 years and sometimes as long as 50 years, although the best cellars will re-cork their old vintages at 25-year intervals

"The soft extractive note of an aged cork being withdrawn has the true sound of a man opening his heart."

- William S. Benbetter

"Wine ... offers a greater range for enjoyment and appreciation than possibly any other purely sensory thing which may be purchased"

- Ernest Hemingway
